Summary

Aspiring Data Specialist with hands-on experience extracting and transforming large datasets using Python and SQL. Proficient in developing and evaluating machine learning models and designing user-friendly dashboards to communicate insights. Seeking opportunities to apply strong data wrangling and analytics skills to make a value.

EDUCATION

Hunter College, City University of New York (CUNY)

Bachelor of Arts, Computer Science | GPA: 3.70/4.00

New York, NY

Jan 2023 – Jan 2027

Relevant Coursework: Data Structures, Machine Learning, Statistics, Python, Data Analysis, Database Management, AI.

Awards: Dean's Honor List(5x)

SKILLS

Languages: Python, JavaScript, SQL.

Technologies: Pandas, MySQL, NumPy, GCP, Scikit-Learn, Git, GitHub, Snowflake, FastAPI, Docker, Apache Airflow, React.js, Node.js, Poetry, Polars, AWS Redshift, Pytest.

Data Tools: Tableau, Seaborn, PowerPoint, Excel (VLOOKUP, PivotTable), PowerBI.

RELEVANT EXPERIENCE

Healthfirst

New York, NY

Data Engineer internship

June 2026 – Aug 2026

- Refactored and modernized legacy **Python** codebases by rewriting Pandas off-scripts into scalable, reusable production-ready functions using functional programming, and rewriting part with **Polars** reducing data transformation runtime by **50%**.
- Modernized an existing data pipeline by migrating from Virtual Machine – based scheduling to **Apache Airflow orchestration**, improving reliability and increasing data extraction speed by **30%** through batch processing and multithreaded execution.
- Refactored and optimized legacy **SQL** queries by restructuring complex **chained CTEs** into cleaner, more maintainable logic, and integrated them into the Python ETL workflow using **Pyodbc** and **Poetry**.
- Developed a RAG system to automate reports migration from old Warehouse to **AWS Lakehouse**. Ensuring consistency, accuracy and optimized developing process.

CUNY Tech Prep

New York, NY

Data Scientist Fellow

July 2025 – May 2026

- Selected as 1 of 125 students (out of 500+ applicants) for a competitive Data Science professional training program.
- Applied data wrangling techniques using **Python** and **SQL** to extract, clean, and transform raw datasets.
- Developed and evaluated machine learning models to identify correlations and generate predictive insights.

PROJECTS

[NYPD NYC Motor Vehicle Collisions Risk Analysis](#)

Jan 2026 - Feb 2026

- Developed an interactive **Tableau** dashboard to identify patterns behind collisions and how to prevent injuries and fatal outcomes
- Cleaned and transformed raw NYPD datasets using **Pandas**, conducted exploratory data analysis **EDA**, and applied statistical measures to identify trends in fatality and injury rates.

[CunyPulseBoard](#) | CUNY Tech Prep Hackathon Winner

Aug 2025 - Aug 2025

- Led a team of 3 developers to design and deliver a full-stack survey insights platform using **React**, **FastAPI**, and **SQLite**, enabling students to share feedback on essential campus services.
- Responsible for writing and optimizing **SQL** queries to extract actionable insights from the database.
- Created interactive dashboards with Recharts.js and custom visualizations to track service demand trends across colleges.

[Customer Segmentation and Sales Analysis for Chips Products](#)

Jul 2025 - Aug 2025

- Built an end-to-end **ETL** pipeline with **Apache Airflow**, **Python** and **SQL** to extract 500K+ sales records from **AWS S3**.
- Transform raw data into an efficient data model and load it into **Snowflake** Data Warehouse for further analysis and visualization.
- Created interactive **Power BI** dashboards to monitor KPIs including gross revenue, average basket size, MoM sales growth, and transactions volume across store segments.

[MTA Buses GTFS Brooklyn Data Warehouse](#)

May 2025 - Jul 2025

- Processed and integrated multi-source GTFS transit data using **Python** and **Pandas**.
- Built interactive **Tableau** dashboards to visualize routes, services and designed an interactive NYC Brooklyn map of stops and routes to provide a clear and user-friendly interface for further usage.
